

## ***PHR* Special Issue on New Strategies in the Delivery of HIV Prevention Services in the US**

*Public Health Reports (PHR)* is inviting papers for a Special Issue on new strategies in the delivery of human immunodeficiency virus (HIV) prevention services in the U.S. The Guest Editor for this Special Issue, Donna L. Richter, Professor in the Arnold School of Public Health at the University of South Carolina, will guide the manuscript selection. The journal is looking for manuscripts that advance the scientific discourse regarding new methods for HIV prevention. Manuscripts addressing the following topics will be sought:

- New strategies in the delivery of HIV prevention services in community-based settings;
- New strategies in the delivery of HIV prevention services in clinical settings;
- New strategies in the delivery of HIV prevention services in faith-based settings;
- Cost analysis of new strategies in the delivery of HIV prevention;
- Lessons learned in implementing HIV prevention programs in diverse settings; and
- Prevention programs designed for those newly diagnosed with HIV.

The editor is encouraging a broad range of manuscripts, especially those reporting on HIV prevention strategies among racial/ethnic minority groups and other groups disproportionately impacted by the HIV epidemic.

Articles in *PHR* are typically 2,500–3,000 words in length. Longer manuscripts, when appropriate, will be considered. All manuscripts reviewed and approved by the Guest Editor and the *PHR* Editorial Committee will be sent for external peer review. The submission deadline for manuscripts is September 21, 2008. The anticipated publication date for the Special Issue is Fall of 2009. Manuscripts should be sent to [manuscripts@publichealthreports.org](mailto:manuscripts@publichealthreports.org) or mailed to: *Public Health Reports*, 7774 Heatherglenn Dr., Cincinnati, OH 45255.

*Public Health Reports* is a peer-reviewed journal of the U.S. Public Health Service and the Association of Schools of Public Health. It is the oldest journal of public health in the U.S. and has published since 1878. The journal is widely distributed internationally, and is indexed by MEDLINE/Index Medicus, Current Contents, EMBASE/Excerpta Medica, Pais International, and LexisNexis. More information on the journal is available at [www.publichealthreports.org](http://www.publichealthreports.org).
