

NCHS Dataline is the *Public Health Reports* column that reports on the programs and activities of CDC's National Center for Health Statistics, the Federal government's premier health statistics agency. NCHS produces data to monitor the nation's health and collects and disseminates a wide range of vital and health statistics. NCHS Dataline features information on current activities and on new data resources--NCHS publications, public use data files, data warehouses, interactive data tools, and other web products--as well as information on how to access them. The column editor for NCHS Dataline is Sandra Smith, NCHS Communications Consultant. For additional information on this column, please contact Ms. Smith at [sss4@cdc.gov](mailto:sss4@cdc.gov).
