ERRATUM

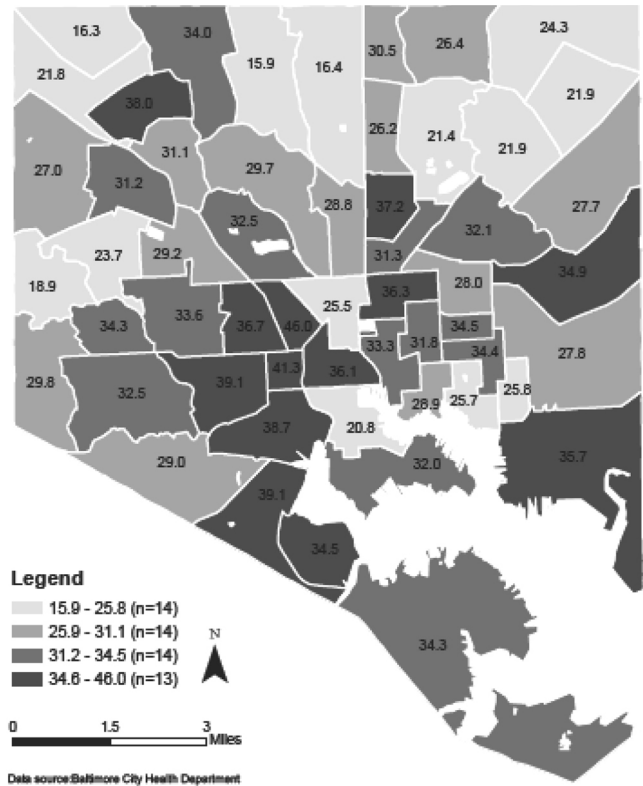

In the Social Determinants of Health supplement, which accompanied issue 128-6, the maps for Figures 3 and 4 in the article by Johnson Thornton et al. (Achieving a Healthy Zoning Policy in Baltimore: Results of a Health Impact Assessment of the TransForm Baltimore Zoning Code Rewrite, p. 104) were incorrect. The correct Figures 3 and 4 are shown here and have been updated in the online version of the article. *Public Health Reports* regrets the error.

Figure 3. Number of violent crimes per community statistical area:^a Baltimore City, Maryland, 2004–2005 average

^aCommunity statistical areas (CSAs) are clusters of neighborhoods organized around U.S. Census tract boundaries. In some cases, CSA boundaries may cross neighborhood boundaries. There are 55 CSAs in Baltimore City. Image courtesy of Baltimore Neighborhood Indicators Alliance.

Figure 4. Heart disease mortality rate per 10,000 population by community statistical area:^a Baltimore City, Maryland, 2004–2006 average

^aCommunity statistical areas (CSAs) are clusters of neighborhoods organized around U.S. Census tract boundaries. In some cases, CSA boundaries may cross neighborhood boundaries. There are 55 CSAs in Baltimore City. Image courtesy of Baltimore Neighborhood Indicators Alliance.
